

CVDI-P | Automatic poultry weighing system

VDI-P | Advanced computer for poultry weight management

- Computer to weigh poultry (broilers and breeders) with up to 3 platforms
- VDI computer can be installed outside the room while the weighing platforms are inside.
- It supplies real time and accurate information of the weight, target weight, minimum and maximum weight, uniformity, percentiles, etc
- Individual configuration for each platform so you can obtain individual data or the average of the 3 platforms
- Each platform can supply data of male, female or mixed.
- VDI has surveillance function to monitor the correct evolution of weight of the poultry.
- Easy configuration via online.
- VDI connects with CT2 to internet for remote control and real time monitoring.

TECHNICAL SPECIFICATIONS

REFERENCE	VDI
VOLTAGE	230 Vac / 12 V
MEASURES	201x163x98mm
IP PROTECTION	IP67
NORMATIVES	89/392/EEC – 73/336/EEC – 73/23/EEC

PSCALE 30 | Poultry weighing equipment up to 30 kg

- Includes a stainless steel load cell.

TECHNICAL SPECIFICATIONS

REFERENCE	PSCALE 30
MEASURES	195x80x95mm
IP PROTECTION	IP67
NORMATIVES	89/392/EEC – 73/336/EEC – 73/23/EEC

+INFORMATION

- Standard deviation
- Coefficient of variation
- Minimum, maximum and average weight

- Difference between males and females
- Coefficient of uniformity

+SECURITY

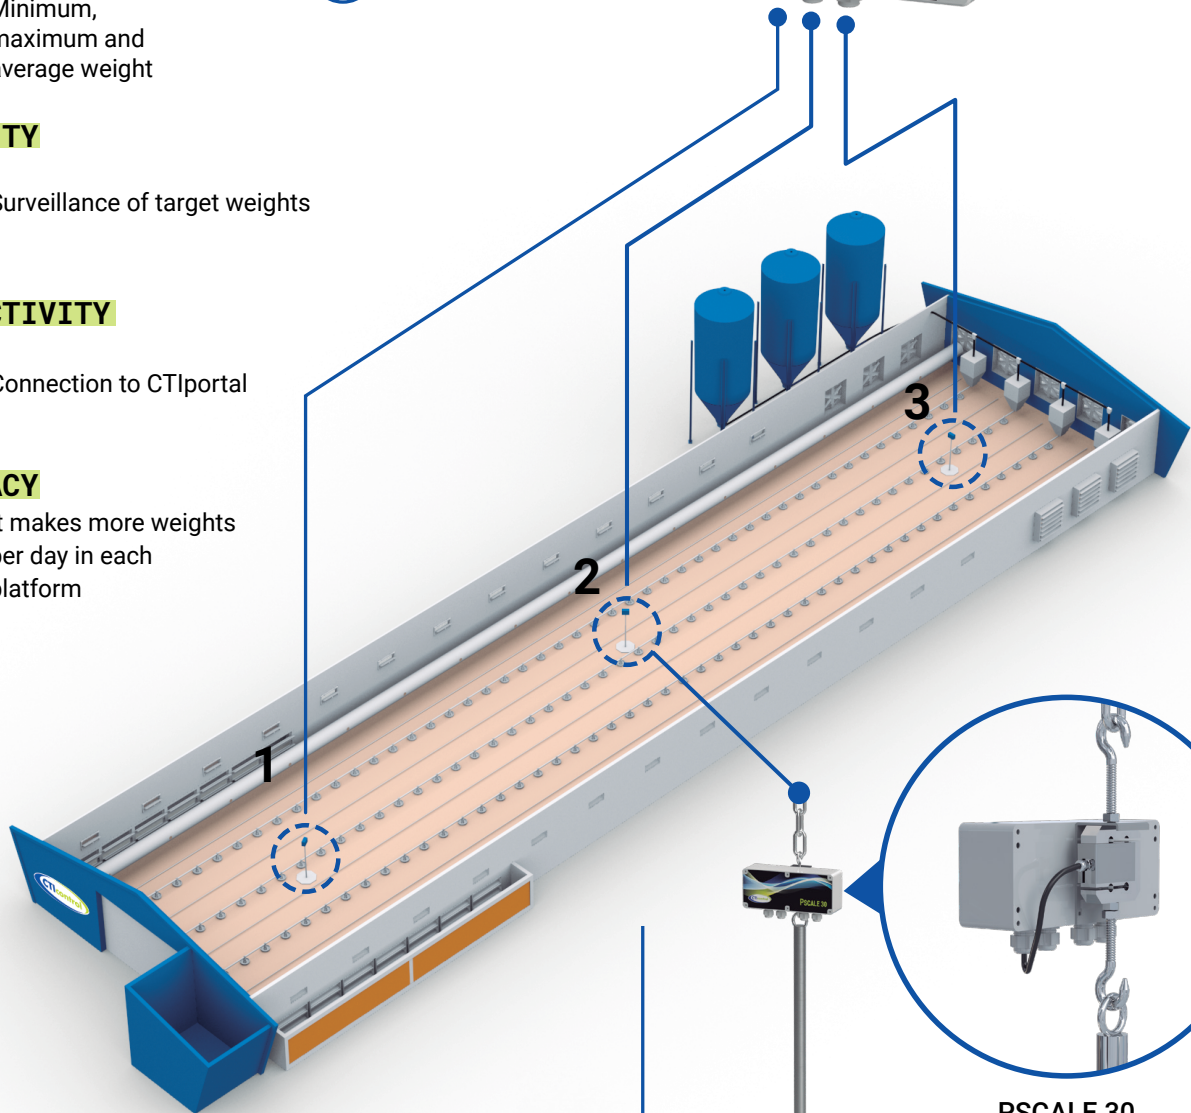

- Surveillance of target weights

+CONNECTIVITY

- Connection to CTIportal

+ACCURACY

- It makes more weights per day in each platform

PSCALE 30

SCALE

TECHNICAL SPECIFICATIONS

MEASURES	Telescopic bar up to 240cm Ø55cm plate
MATERIALS	Stainless steel bar Non-slip aluminium plate
